5/14/2020	United States	Lima	Multiple	The Allen County Sheriff's Office started receiving reports from law enforcement and fire departments of severely diminished radio communication abilities. After failing for two days to restore radio communication, authorities determined the problem was caused by a source of interference in the area, which they tracked to a private residence in Lima, OH. Authorities contacted the home's resident, who refused to cooperate and denied causing the radio interference. The Allen County Sheriff's Office SWAT Team executed a search warrant at the residence, where they discovered multiple suspected explosive devices. Allen County Regional Bomb Squad technicians responded to the scene, rendered safe one device that was described as a pipe bomb, and assisted in clearing the rest of the residence. During the search, officers discovered at least one unidentified device that could have been the source of the interference.
